Work Experience

AT&T Mobility

April 30, 2023 - Present

Call Center

1. Use **Salesforce** software in combination with **CRM** to authenticate and help customer.
2. Had a SIX weeks of thorough training, after the training, was able to help customers with minimum assistance
3. Help customer troubleshoot Internet modem, home phone, TV, fiber internet and DSL
4. We also open tickets for customers and schedule dispatch for field technicians as well.
Use Techsee remote support tool to help direct customers remotely for installations and troubleshoot
5. We are trained to go beyond just troubleshooting fiber internet, home phone and TV
 - a. We are thoroughly trained to deal with billing questions, answer all billing concerns and walk customers through the bill and explain line by line.
 - b. We also deal with crediting or refunding the customer when appropriate as well.
 - c. We are strongly encouraged to encourage customers to download and use AT&T apps because that would help customer by allowing them to troubleshoot their problem before they call us, most of the times they don't have to if they used the apps. We are encouraged to inform customers of other issues they may have such as amount dues and equipment malfunctions and line quality that they may not be aware of so that way they don't have to call us back multiple times for each issues. We can help them resolved it this one time to avoid calling back.
